How you can support us (いろいろな応援の形)

Our message

At Kokoro Talk Music Studio, we aim to increase the number of music therapists who have a real connection with the citizens of each and every town in Japan. We want to expand the availability of music therapy to benefit the mental and physical health of everyone, leaving not a single person behind.

Furthermore, through music therapy, we strive to provide a service that will offer relief and resolution for those who feel their emotional balance and personal relationships are on the verge of collapse: for those who juggle many problems, those who provide care, for families, parents and their children.

Most of our expenses are needed to create these new projects and plans, hold events and to cover the purchase and maintenance of musical instruments. Your support is absolutely essential for this NPO to function. For those of you who sympathise with our cause, together, let us create a society which is kind to the hearts and minds of all.

Miyuki Nakai
